

## Product Information

### Water suitable for cell culture, Sterile-filtered

Catalogue Number: GBW01/01F

## General Information

---

High-quality water is meticulously purified through distillation, reverse osmosis, ion exchange, and UV disinfection, making it ideal for sensitive cell culture applications. This water is versatile and can be used in preparing cell culture media, buffers, and laboratory reagents, as well as for rinsing bioreactors, plasticware, and glassware. It's also suitable for precision techniques, including chromatography (HPLC) and spectrometry, ensuring reliable results across a wide range of laboratory applications.

## Product Specification

---

Appearance : Clear colorless liquid

Storage & Shelf Life : Store at +2°C to +25°C upon arrival. Once opened store at +2°C to +25°C and use within 11 months

Shipping Conditions : Ambient

**This product is for research use only.**
